

Covid-19 Update

The committee reviewed the situation in September and it was agreed that limited Observed Drives and Advanced tests could resume, but these were suspended again after the October review, when some local towns became areas of concern. In the meantime virtual meetings continue online via Zoom; and we will go on producing the Bunker News sheet to email out on a regular basis so everyone is kept updated.

Committee meetings also continue to conduct business online, and keep us up-to-date with the safest way to protect our Members and Associates and resume Observed drives. Activities for the wider group are still on hold, because of the difficulties of meeting safely in our usual venue. The AGM will be held on line with Zoom Conferencing.

This is the earlier advice posted at the start of the pandemic.

CORONA VIRUS: TO ALL OUR MEMBERS

Dear LAM Members,

You will undoubtedly be aware of the current situation regarding the Corona Virus. The Committee of Lichfield Advanced Motorists take your safety very seriously (both on the road and in your daily lives) and we have come to the regrettable decision that activities in the Group should be temporarily ceased until the situation improves. Thus we will be cancelling all LAM public meetings with immediate effect and until further notice. This includes end of month meetings, mid month drive meetings, social events, committee meetings and the AGM. We are recommending that members of LAM do not attend any other meetings connected with LAM, IAM or advanced driving.

We are also recommending that all observed drives are cancelled until further notice. If you are still in a position where you are using your car, we would encourage you to continue practising the skills that you have already learnt about, but we are sorry that, for the time being, we will not be able to offer any observer feedback. These are unprecedented times and we feel obliged to take action to support the worldwide attempts to reduce the spread of the virus and protect the vulnerable members of society. Of course there is a good amount of regularly updated information from central government on this issue and we urge all members to follow government advice. We look forward to the time when the situation improves and we are able to recommence normal activities. We hope that all our members, their families and friends remain in good health during this difficult time.

Warmest regards,

The Committee
